

DELITE GLOBAL

# Delite Global Services

Where execution becomes predictable

# Product and execution must be owned together

Risk arises when product **decisions and execution** responsibility are split.

Delite takes single-point responsibility for critical building-material systems from **solution finalization** and delivery to execution and performance on site.

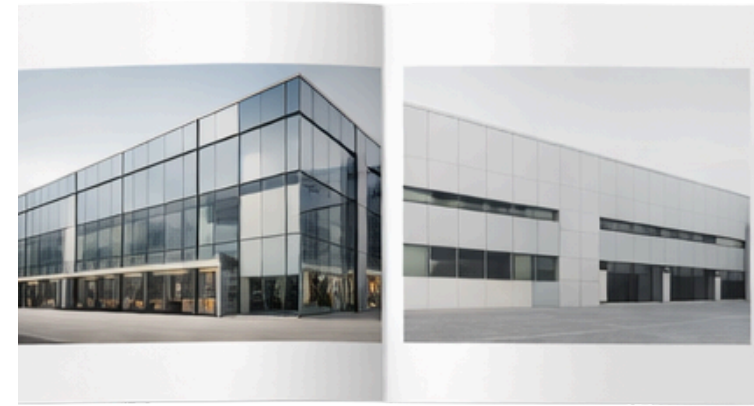

# Building-material systems, owned end to end principal brands

Backed by Globally and Nationally **trusted principals**, including Tostem, APL Apollo, Shakti Harmonn, Ozone, Technorail, and Alugate.

# Execution is not supervision, It is ownership

- Design alignment and **solution finalisation**
- Supply coordination and **delivery planning**
- Site readiness and sequencing
- **Installation quality** and interface management
- **Performance** assurance at handover

# Strengthening execution without disrupting authority

- Does not replace architects or **design consultants**
- Does not bypass procurement teams or PMCs
- Does not interfere with **contractor authority**

**Delite integrates into existing governance structures.**

# The Delite Way

- Systems before individuals
- **Accountability** without ambiguity
- Product and **execution owned** together
- Predictable **outcomes** consistently

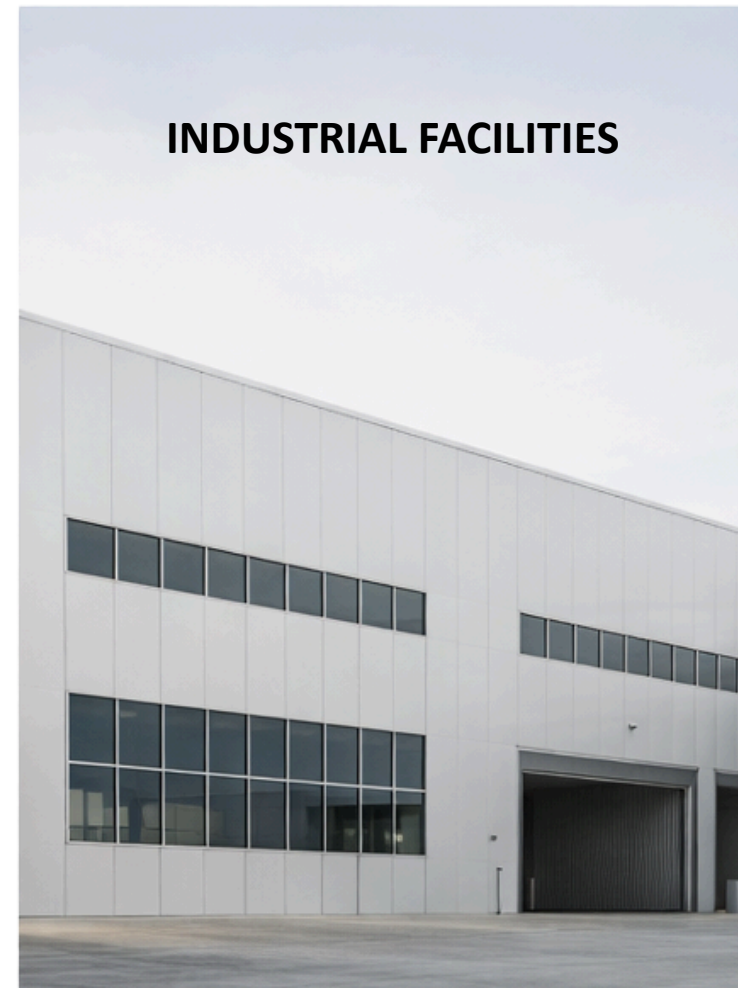

# Built for environments where failure is expensive

Where multiple systems interact and predictability matters.

COMMERCIAL DEVELOPMENTS

INDUSTRIAL FACILITIES

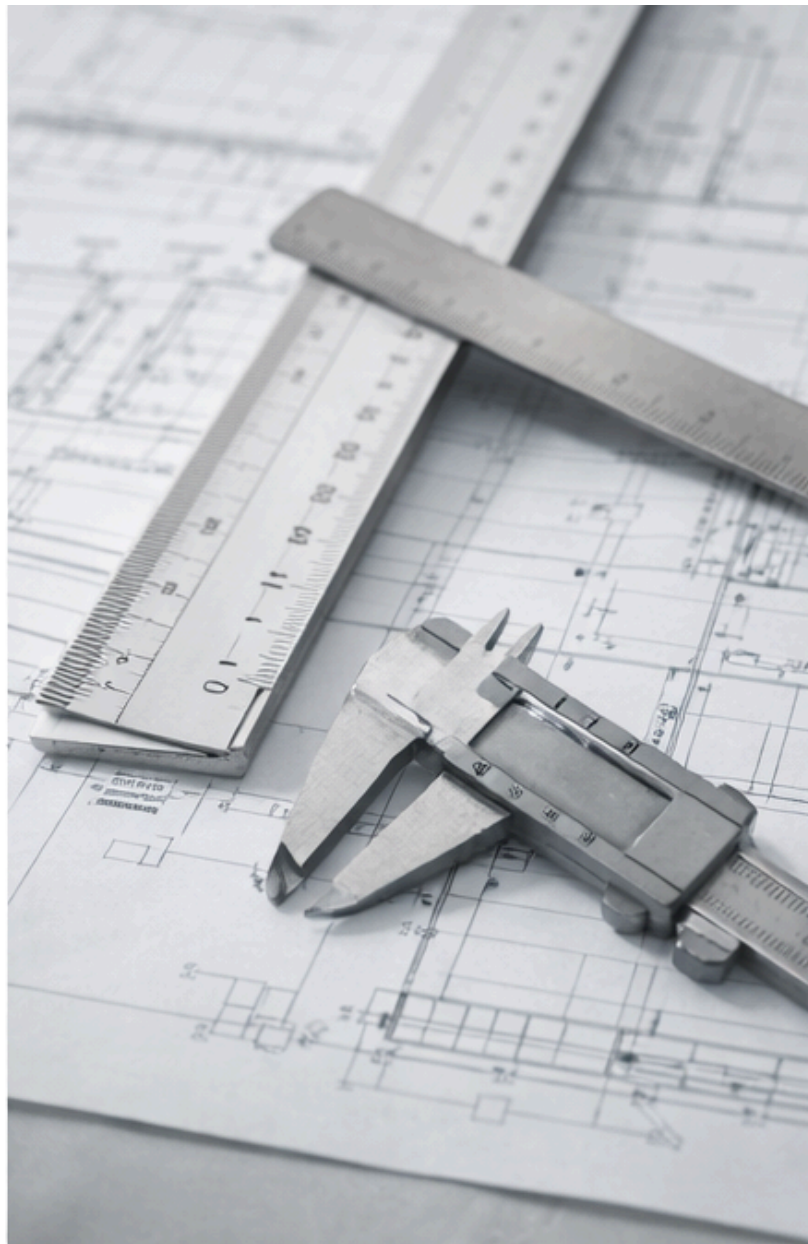

INSTITUTIONAL BUILDINGS

# Predictability is never accidental, **It is engineered**

Where execution becomes predictable

# The Deltra Group Context

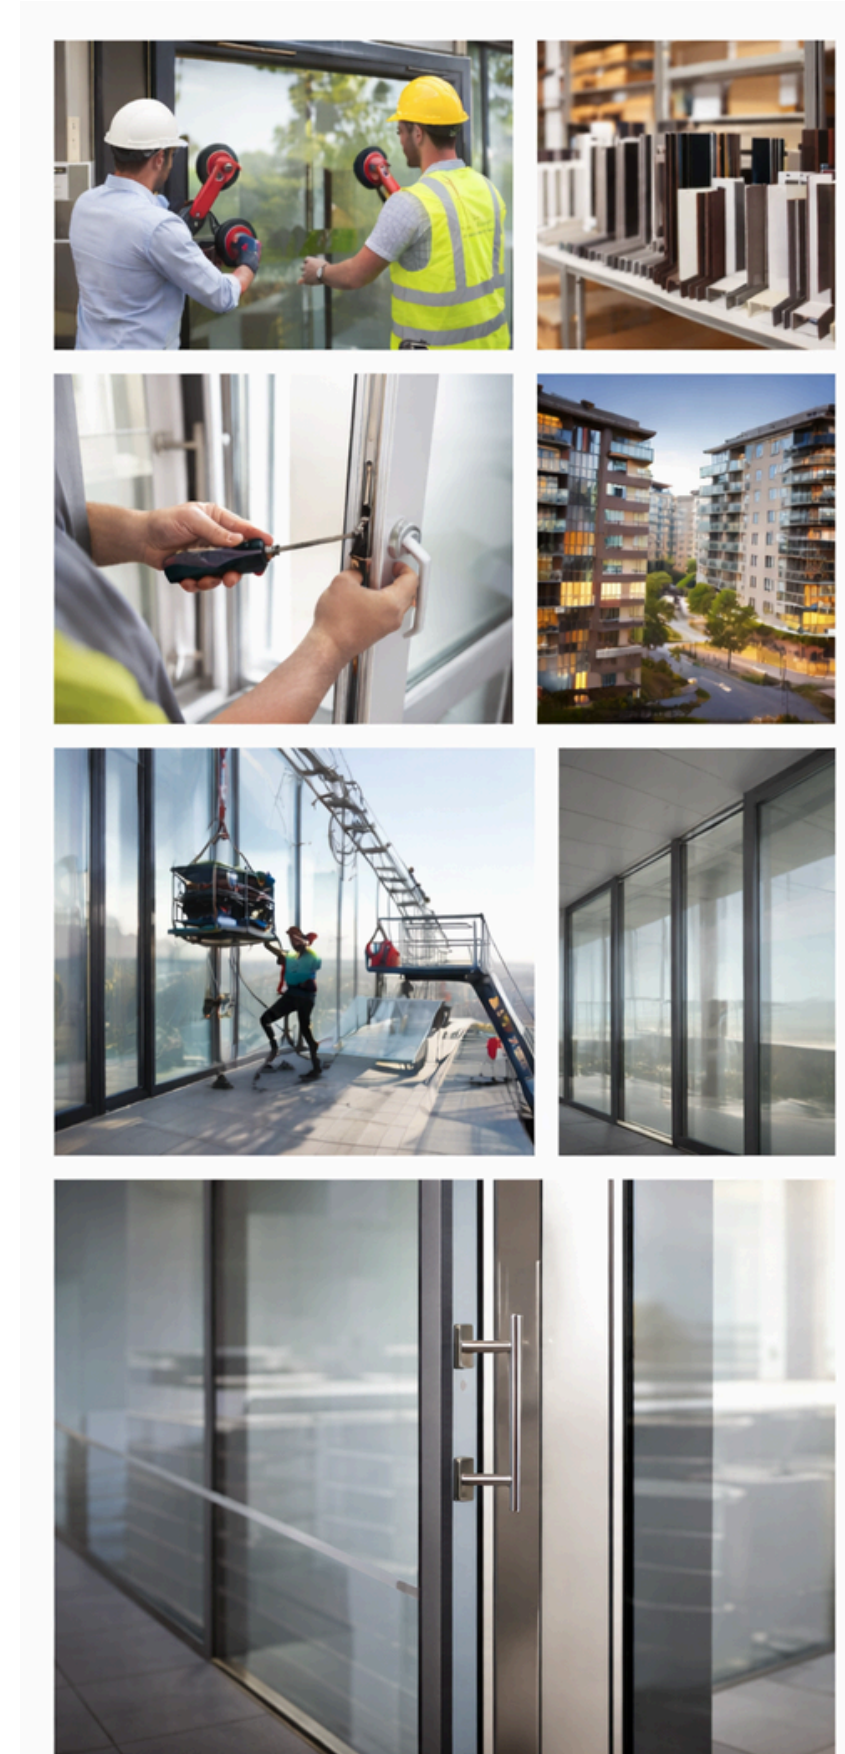

**Delite Global Services** is part of the **Deltra Group**.

The Deltra Group operates across the building-materials ecosystem, with deep, hands-on experience in solution delivery, system integration, and execution across diverse project environments.

Deltra Global has built strong capabilities in solution sourcing, system integration, and customer-facing delivery—particularly across complex residential and mixed-use developments, where precision, coordination, and finish quality are critical.

Delite Global Services extends this experience into the commercial, industrial, and institutional domain—focusing exclusively on execution ownership, where predictability, governance, and system performance are paramount.

Together, the Group enables end-to-end accountability—from system understanding and selection to execution performance on site.
